

■ DISCORD GRAND PRIX BOT

The Ultimate F1 Discord Simulation - Complete Command & Feature Guide

■ Progression & Game Economy

To reach the top ranks and unlock the ultimate Level 20 car parts, you must carefully manage your team's budget and earn XP. A fully active player will take approximately 2.5 to 3 months of daily play to fully max out their racing team.

- **Earning Credits:** Claim 500¢ daily (/daily), perform odd jobs (/work) once per day for 100-500¢, chat in text channels (5¢/msg, max 200¢/day), or spend time in voice channels (2¢/min, max 200¢/day). GPs reward up to 5000¢ for podiums.
- **Race Duel Payouts:** Friendly duels (wager: 0) award 200¢ to the winner and 50¢ to the runner-up. Wager duels require both players to put in the entry fee (e.g. 1000¢ each). The winner takes the entire combined pool (2000¢) and the loser gets nothing (loses their fee).
- **Leveling Up & Rewards:** Earn XP from Duels (Win: +150 XP, Loss: +50 XP) and Grand Prix (Finish: +500 XP, Podium: +1500 XP). Leveling up to a new level automatically awards New Level * 500¢ in cash!
- **Progression Costs:** Car upgrades range from 200¢ to 26,800¢ (Level 20). Total cost for 6 parts is 991,800¢. Driver stat training costs 500¢ per point.

■■ Garage Upgrade Cost Chart (per part)

Level	Cost	Level	Cost	Level	Cost
L2	200¢	L9	3,700¢	L16	15,000¢
L3	400¢	L10	4,700¢	L17	17,500¢
L4	700¢	L11	5,900¢	L18	20,300¢
L5	1,100¢	L12	7,300¢	L19	23,400¢
L6	1,600¢	L13	8,900¢	L20	26,800¢
L7	2,200¢	L14	10,700¢		
L8	2,900¢	L15	12,700¢		

■■ F1 Race Strategy & Pit Dynamics

Races are simulated in real-time. Success requires balancing tyre wear, driver aggression, flag conditions, and weather alerts:

- **Tyre Compound Selection:**
 - ■ **Softs:** Fast base pace, high wear (lasts ~4-6 laps).
 - ■ **Mediums:** Balanced pace, moderate wear (lasts ~7-10 laps).
 - ■ **Hards:** Slower pace, low wear (lasts ~11-15 laps).
 - ■ **Intermediates:** Essential for Rain. Slick tyres on a wet track, or Inters on a dry track, suffer severe pace loss and wear.
- **Driver Pacing Styles:**
 - **Aggressive/Push:** Fast lap times, high tyre wear, +3.0% crash/DNF risk.
 - **Standard/Balanced:** Baseline lap times, standard wear, baseline crash risk.
 - **Conservative/Save:** Slower lap times, low wear, -2.0% crash/DNF safety buffer.
- **Dynamic Pit Stops:** Set your start compound with /strategy. During the race, type /pit [compound] or click ■ **Pit Next Lap** in your DM to queue a tyre change for the end of the current lap. Pit lane loss is 11s under green, and ~6s under VSC/SC.
- **Weather Radar:** If rain begins on Lap R, a channel warning is sent on Lap R-2 and R-1. Schedule a pit stop for Intermediate tyres before the rain starts to avoid massive spin outs!
- **Stint Pacing Lockouts:** Pacing changes are locked out on transition laps (Lap 10, 20, 30, etc.) to prevent race condition confusion. Set strategy for stint blocks in advance (e.g. L1-9 for stint starting on L11).

■ Car Parts & Driver Stats (How they affect performance)

Every garage upgrade level and driver rating point alters the race physics clock and simulation equations:

■ Garage Car Parts (Levels 1-20):

- **Engine:** Increases top speed on straightaways (reduces base lap times on all tracks).
- **Aerodynamics:** Improves cornering downforce. Direct boost to overtaking success and DRS effectiveness.
- **Tyres:** Improves tyre longevity by reducing wear rate per lap. Keeps tyres in peak grip windows longer.
- **ERS (Energy Recovery System):** Yields additional speed acceleration during **Push** pacing style stint periods.
- **Reliability:** Lowers the baseline mechanical failure rate and reduces DNF crash risks.
- **Pit Crew:** Reduces the pit lane entry and exit time overhead, making tyre swaps faster.

■ Driver Stats & Ratings (1-100):

- **Pace:** Direct reduction to base lap times, representing the driver's raw speed.
- **Qualifying:** Enhances lap times during Q1/Q2/Q3 qualifying sessions to secure higher grid slots.
- **Wet Weather Skill:** Minimizes the speed penalty and spin out risk when driving on a wet track.
- **Consistency:** Reduces random lap time variance, resulting in steady, predictable lap times.
- **Aggression:** Boosts overtaking success probability, but increases DNF crash risk when running at aggressive paces.
- **Overtaking:** Increases probability of passing lead cars and successfully defending positions from trailers.

■ Visual Upgrades & Driver Stats Blueprint Chart

■ User / Driver Commands

Command	Description	Usage / Options
/start [name]	Create your racing profile, choose a team name, and receive starting credits (1,500€).	name: 3-32 character alphanumeric name.
/profile	View your driver stats (Pace, Qual, Consistency, Wet weather, etc.) and leveling progress.	Displays ratings and stats.

/garage	Inspect your car upgrades (Engine, Aero, ERS, Tyres, Reliability, Pit Crew) and current damage.	Shows level (1-20) and wear status.
/upgrade [part]	Spend credits to upgrade a car component. Prices increase exponentially per level.	part: Select part from dropdown.
/train [skill]	Spend 500€ to train a driver skill by +1 rating point (caps at 100).	skill: Select skill from dropdown.
/race [opponent] [wager]	Challenge another user to a live 1-lap race duel (wager credits optional). Both players pay fee.	opponent: Ping member wager: Optional sum.
/pit [tyre]	Schedule a tyre change pit stop for the end of the current lap during a live GP.	tyre: Soft, Medium, Hard, Inters.
/strategy	Set your starting tyre compound and initial pacing style before the GP starts.	Select options from interactive dropdowns.
/joinrace	Register and pay 1,000€ entry fee to secure a spot on the upcoming GP grid.	Requires 1,000€ starting balance.
/leaverace	Withdraw from the upcoming GP at any stage before it starts running and get a 1,000€ refund.	Available during signup and Q1/Q2/Q3.

■■ Game Administrator Commands

Command	Description	Usage / Options
/gp [laps]	Manage GP events. View status or schedule a new event with custom lap distance.	laps: Custom laps 1-200 (Default 15).
/give [member] [amount]	Grant a specific amount of credits to a user's profile.	member: Ping driver amount: Positive int.
/admin setstat	Directly set driver ratings (1-100) or car part upgrade levels (1-20) for debug/giveaways.	user: Ping category: dropdown stat: text value: int.
/admin resetprofile	Wipe a user's stats and rebuild their garage back to rookie levels.	user: Ping member to reset.
